

Beanies Mexican Restaurant & Cantina
"A Little Bit of Mexico In Downtown Port"

To whom it may concern:

My partner and I have owned and operated a restaurant for over 15 years. Over the years our business has grown to the point where expansion was necessary to maintain growth and satisfy our customers.

To accomplish expansion we chose to completely renovate a 100-year-old structure that adjoined the site of our original restaurant. Due to structural integrity of the 100-year-old building and integrity of the renovation, professional architectural expertise was mandatory.

We met with several qualified architectural firms and made our selection. Our choice was Haag Muller.

My partner and I had several concerns as we considered the reconstruction of our restaurant, specifically timing, cost and the finished product.

Haag Muller was "with us" during every phase of the construction project. Their staff not only offered invaluable input saving us unnecessary expenses but also was instrumental in gaining full support of our project with the Port Washington planning commission saving us time.

The project took nearly four (4) months and the outcome was dramatic. The restaurant received the Beautification Award from the City of Port Washington.

Haag Muller took into consideration our needs, and our budget constraints. They saved us money and they were interested in delivering the project on time. They listened to our ideas and created a restaurant that has become a show place in Port Washington. They exceeded our expectations and additionally they have become great customers and friends as well.

Sincerely,

Marcia Endicott
