INNOVATIVE LEARNING COMMUNITIES

## Subject: Quality of Haag Muller Services

To Whom It May Concern:

Haag Muller, Inc., is a talented and well-managed architectural/engineering firm with a proven track record of success.

I had the good fortune to collaborate with them to develop the Design and Construction Documents for Yeshiva Elementary School in Milwaukee; a project that received an unusually positive review by architectural critic Whitney Gould (<http://www.jsonline.com/news/metro/nov01/goulcol26112501a.asp>), an Honor Award from School Construction News ([http://www.designshare.com/Awards/2002/Listing\\_Awards\\_02.htm](http://www.designshare.com/Awards/2002/Listing_Awards_02.htm)), an "Impact on Learning" Award from the Council of Educational Facility Planners International and School Planning and Management Magazine, and post occupancy raves from the Owner.

The Haag Muller team was responsive to design issues and achieved all of the project goals on a tight site with a tight budget. All of the technical issues associated with of code compliance, mechanical, electrical, and structural systems were coordinated smoothly.

The project included both new construction and renovation of two connected structures. When issues came up during construction related to existing conditions, Haag Muller responded promptly and efficiently.

Haag Muller was a pleasure to work with at every phase during the project. They have a good design, technical, and management team in place, and I wholeheartedly recommend them for any architectural project.

Sincerely,

Randall Fielding, AIA, Chairman
