Re: Reference for Virginia Bodus, IIDA

To Whom It May Concern:

Franciscan Skemp Healthcare recently completed two large projects which incorporated design work by Virginia Bodus, Interior Designer from Haag Muller, Inc.

Virginia designed the public areas of our Emergency/Urgent Care Center and new Holmen Clinic. She took the time to get to know our practices and created a very pleasing environment that our staff and patients love.

Virginia worked well with our architects and contractors. She provided the details allowing them to complete the structure. The textures and art for the project were exceptional. Jay Fullmer, the artist created the right texture, and elements to accent the space.

We were very satisfied with Virginia Bodus, and would highly recommend her to anyone looking for a unique, welcoming design for their clinic or business.

Sincerely,

John Nemec
Vice President
Franciscan Skemp Healthcare
