Mr. Mike Muller
Haag Muller Inc.
101 East Grand Avenue
Port Washington, WI 53074-2216

Dear Mike,

I want to extend my congratulations and my appreciation to you for the architectural work Haag Muller has done on the Six Mile Lake project. This property is so unique that it required an equally unique plan for the structure to become "of the hill" or "part of the hill" as Frank Lloyd Wright would say, by meticulously expressing Wright's excellent design elements and ideas. Due in large measure to your training at the Frank Lloyd Wright Institute this goal has certainly been achieved.

You personally, as well as your staff have molded an aesthetic creation into this almost mystical, challenging site, combining beautiful materials with handsome design. The home when it is built will not only be truly pleasing to the eye and the soul and immensely functional, but it will also be very solid structurally.

You and Ted are to be congratulated on your group of carefully recruited, very capable, pleasant to work with professionals. Haag Muller Inc. has proven up to the challenge at Six Mile Lake, covering all aspects of concept, design, development, structural and construction issues.

Mike, if Mr. Wright were alive today I'm certain he would look at your work with great pride.

Sincerely,

Arthur J. Sinkula
